Discounted training

RRC
INTERNATIONAL

RRC says it is looking forward to the Health & Safety North Expo in its new home in EventCity, Manchester and Catherine and Kevin will be on stand N9 to answer any questions visitors may have on RRC's HSE training and consultancy services.

RRC says over the two days it will be offering discounted places on its Manchester NEBOSH Certificate, Diploma and IOSH courses or for training further afield, the RRC team will be able to do a deal for its Newcastle, Leeds or Birmingham centres.

RRC says new at the show this year will be the brand new online courses for the NEBOSH National and International Environmental Diploma's, and the NEBOSH Process Safety Management Certificate.

JSP, a European independent manufacturer of above-the-neck personal protective equipment (PPE), says it was first past the post in the UK and Europe after being awarded BSI Certification to the new PPE Regulation for a range of protective products.

JSP says it has received an unprecedented four BSI CE certificates for its EVO23, 4, 5 and EVO Full Brim industrial safety helmets, as well as its Force 8 half mask and PressToCheck P3 Filters, which enable wearers to easily and reliably check the face-fit of their half mask, and its Sonis hearing protectors.

JSP says it has ensured that customers buying a JSP product today can have total confidence that it is future-proofed and complies with the new PPE Regulation (EU) 2016/425.

Footwear brand DR. MARTENS says its new modern outdoor range has been specifically designed to offer workers immediate work boot comfort and allow for a seamless transition when replacing boots.

The company says the new collection comprises two innovative designs including Ridge ST and Grapple ST. Ridge ST S3 is a 6-tie hiker boots with water-resistant, rich, oiled leather uppers. It features a steel toe cap, anti-penetration midsole and anti-static properties. Grapple ST is a SB 6-tie, lightweight lace-to-toe work hiker in soft industrial grade tumbled leather uppers, and features an internal steel toe cap, padded collar and bellows tongue. Dr. Martens says both boots include a unique X-shaped shank that has been engineered to deliver stability and control, without compromising under-foot flexibility.

Breathing safety

FERCELL says it was asked to assist the English National Opera with a fume extraction problem within the costumes department. A huge element of opera are the elaborate costumes, of which many are made at the London Coliseum. They required a new fume extraction system that would extract solvent fume from the gluing process associated with creating intricate masks and clothing. Ferrell's proposed solution was to completely remove the existing fan and replace it with a Geovent MSQ centrifugal fan set. Ferrell's engineer installed a new correctly-sized and balanced ducting system, linked up to the connection of an articulated arm and fume cabinet. The fumes are now collected by a flexible arm so there is more space to work and move around in, and fumes are externally disposed of.

J-Energy collection catalogue

French safety footwear brand JALLATTE says it has launched its new J-Energy collection catalogue, featuring soles made with Infinergy, a new material that absorbs shocks and returns their own energy to the wearer with every step. The company says the brochure features a choice of Jallatte J-Energy models, all expertly-designed and manufactured with Infinergy, which is made of expanded thermoplastic polyurethane (E-TPU), as opposed to the traditional PU and was originally used to improve athletic performance, to increase and improve the wellbeing of wearers and add extra spring to their step.

Jallatte says the J-Energy footwear collection is lightweight, comfortable, abrasion, chemical and traction-resistant and extremely resilient and durable in a wide range of temperatures.

Expanding PPE offerings

Following the announcement in October 2016 that the uvex safety group had acquired a substantial interest in HexArmor enabling its re-entry into the North American safety market, uvex and HexArmor have announced their partnership in the UK. UVEX SAFETY (UK) says it will now stock, sell and market HexArmor safety products, adding high level cut, puncture, impact and abrasion resistant hand protection to its existing range. "We're extremely excited to have the opportunity to offer industry-leading technology in cut, puncture and needlestick protection to our customers," said John Gill, MD of uvex. "HexArmor has an excellent reputation in the North American PPE industry for leadership in innovative technology so being able to integrate and combine their expertise within the diverse uvex PPE portfolio increases our capability to provide solutions."
